

MONDAY MAY 11, 2020

SCRR / RSE Peter Wilson Lecture 2020

‘Young People & Evidence: Lessons from youth debate on climate change’

Monday May 11, 2020

Online event

UPDATE: please see below for event report.

This event brings together young speakers from diverse backgrounds to inspire us with discussion on how we can share and work with evidence in rural climate change responses.

In order to produce scientifically-sound and socially-just solutions, our responses to global climate change must encompass multi-disciplinary evidence from natural science, social science, arts, humanities, and traditional and local knowledge.

With so many ways of knowing the world at play, young scientists and civilians are at the forefront of synthesising and communicating these wide-ranging forms of evidence.
